<b>Tetanus, Diphtheria</b> HealthLinkBC File # <a href="#">18a</a>	<ul style="list-style-type: none"> <li>Adults, every 10 years.</li> </ul>		
<b>Travel vaccines</b> HealthLinkBC File # <a href="#">41c</a>		<ul style="list-style-type: none"> <li>Varies by destination, consult with a travel health clinic.</li> </ul>	

All of the vaccines listed above are available in British Columbia. Public health programs provide vaccines based on your age, gender, health, occupation, medical or lifestyle risks. For more information speak to your health care provider. Some of these vaccines may be provided for free in response to disease outbreaks. Adults may purchase any of the vaccines listed in this table that are not available for free at most pharmacies and travel clinics.
